

tinyxml2::MemPool

```
graph BT; A["tinyxml2::MemPoolT< ITEM_SIZE >"] --> B["tinyxml2::MemPool"]
```

The diagram illustrates an inheritance relationship between two classes in the tinyxml2 library. At the bottom is a box representing the base class, `tinyxml2::MemPoolT`, with a template parameter `< ITEM_SIZE >`. A solid blue arrow points vertically upwards from this box to a second box at the top, which represents the derived class `tinyxml2::MemPool`. Both boxes have a black border and are centered horizontally.

tinyxml2::MemPoolT
< ITEM_SIZE >
